

# bePaid

## Information for payment by bank card via the Internet

After clicking the "Buy" button, you will be redirected to a special secure payment page of the processing system [bePaid \(https://bepaid.by/\)](https://bepaid.by/)

The payment page will indicate the order number and the amount of the payment. To pay, you need to enter your card details and confirm the payment by clicking the "Pay" button.

If your card supports 3-D Secure technology, the system will ask you to go through the standard one-minute cardholder verification procedure on the page of your bank (the bank that issued your card).

After payment, our manager will contact you to clarify the delivery details.

Please note that after the payment is made, a confirmation of the payment will be sent to your email address. We ask you to save your payment data.

We accept payments by the following bank cards: Visa, VisaElectron, MasterCard, Maestro, Belcard.

Bank card payments are made through an electronic payment system [bePaid \(https://bepaid.by/\)](https://bepaid.by/). The bePaid payment page meets all data transmission security requirements (PCI DSS Level 1). All confidential data is stored encrypted and maximally resistant to hacking. D

Access to authorization

the pages are carried out using a protocol that ensures secure transmission of data on the Internet (SSL / TLS).

Refunds are made to the card with which the payment was previously made. The term for receipt of funds on the card is from 1 to 30 days from the date of the return by the Seller.

In the absence of delivery of the goods to the customer after 45 days, the seller undertakes to return the money to the buyer's card.
